DETAILED ACTION

The following action is in response to application 10/825,573 filed on April 15, 2004.

Allowable Subject Matter

Claims 1-12 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record fails to show or render obvious the method for initializing a control unit for controlling an internal combustion engine as claimed, and particularly including detecting a start request probability, ensuring an interruption in a flow of power between the engine and driven wheels, synchronizing a control unit with the engine so that the control unit detects a position of the engine, deactivating the electric motor, and including the remaining controls of claims 1, 10, and 11, respectively.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Davis has been cited to show a synchronization of an engine and ECU.

Kataoka, Aota, Tamor, Kumazaki, Nagae, Morimoto '206 and '903 have been cited to show similar engine/transmission controls.
